# Learning Objectives

- To understand the Clear Alignment Strategy Planning process from high-level to implementation steps
- To equip participants with a facilitation plan for strategy development that works with executive boards and start-ups, teams and departments, and every organisation in between.
- To share together our approaches and lessons learned from helping teams and organisations to plan a strategy, implement a strategy and facilitate large group interventions.

**CLEAR ALIGNMENT**

E F F E C T I V E   S T R A T E G Y   R E A L I S E D

Why?

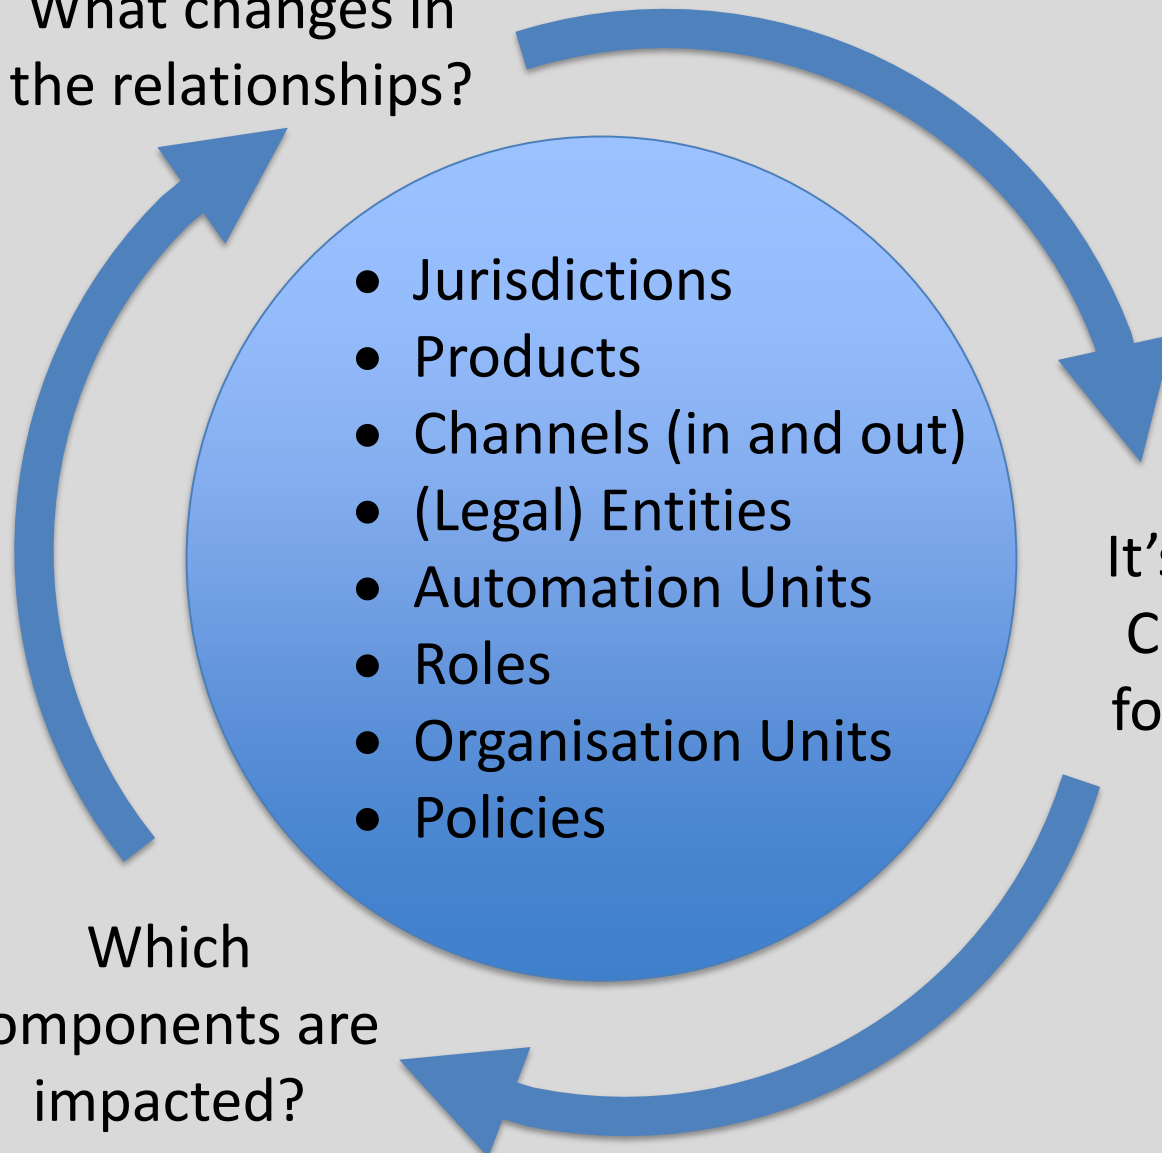

# Organisation Platform

What changes in the relationships?

- Jurisdictions
- Products
- Channels (in and out)
- (Legal) Entities
- Automation Units
- Roles
- Organisation Units
- Policies

It's all about a Competition for Resources

Which components are impacted?

# Why Do Strategies Fail?

Failure to focus on what is important

Failure to communicate effectively

Failure to hand-over

Fire and Forget

“Lose sight, lose the fight”

# Why is it Difficult To Manage?

Jerky

Constantly Emerging

Unseen consequences

Multi-dimensional

# What Do We Need?

A language

A collaborative process

A map

.... and the ability to  
rapidly adapt

# When It Works

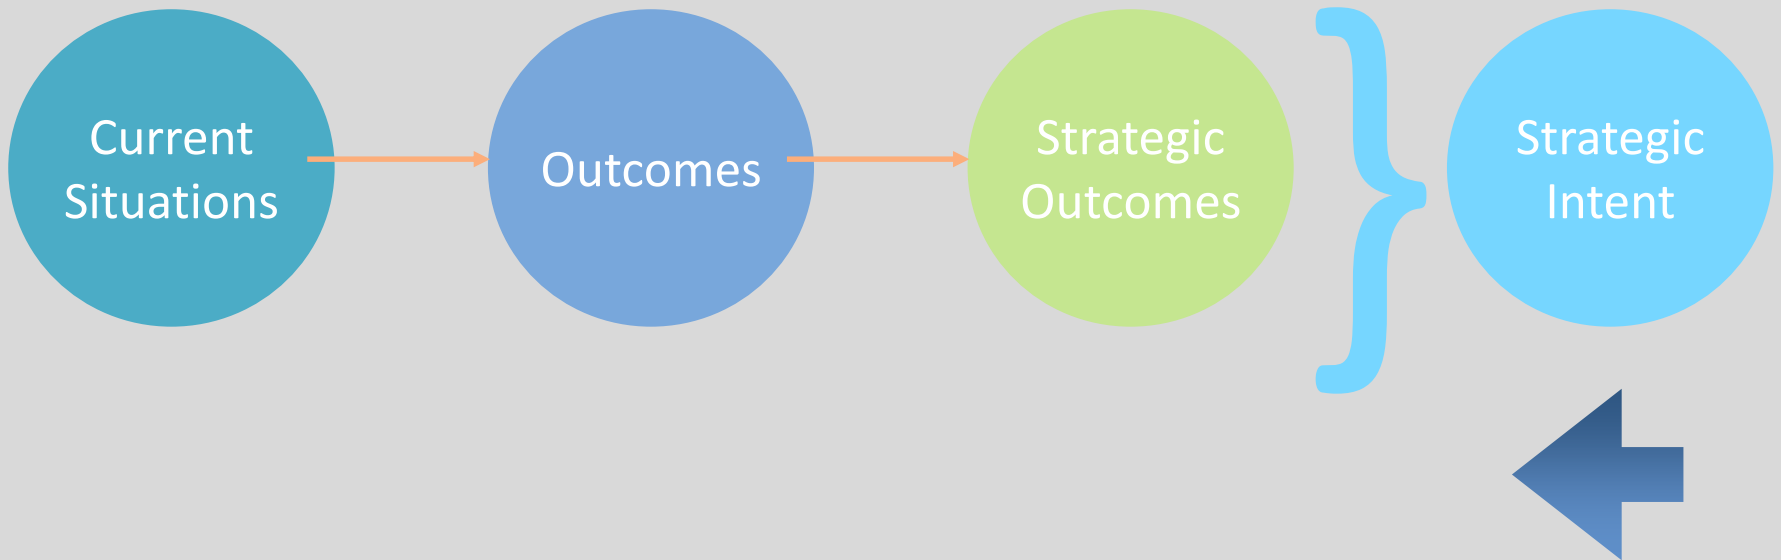

The organisation is aligned, with everyone working towards the goals/key objectives

# Strategy Mapping

# Design the Strategy

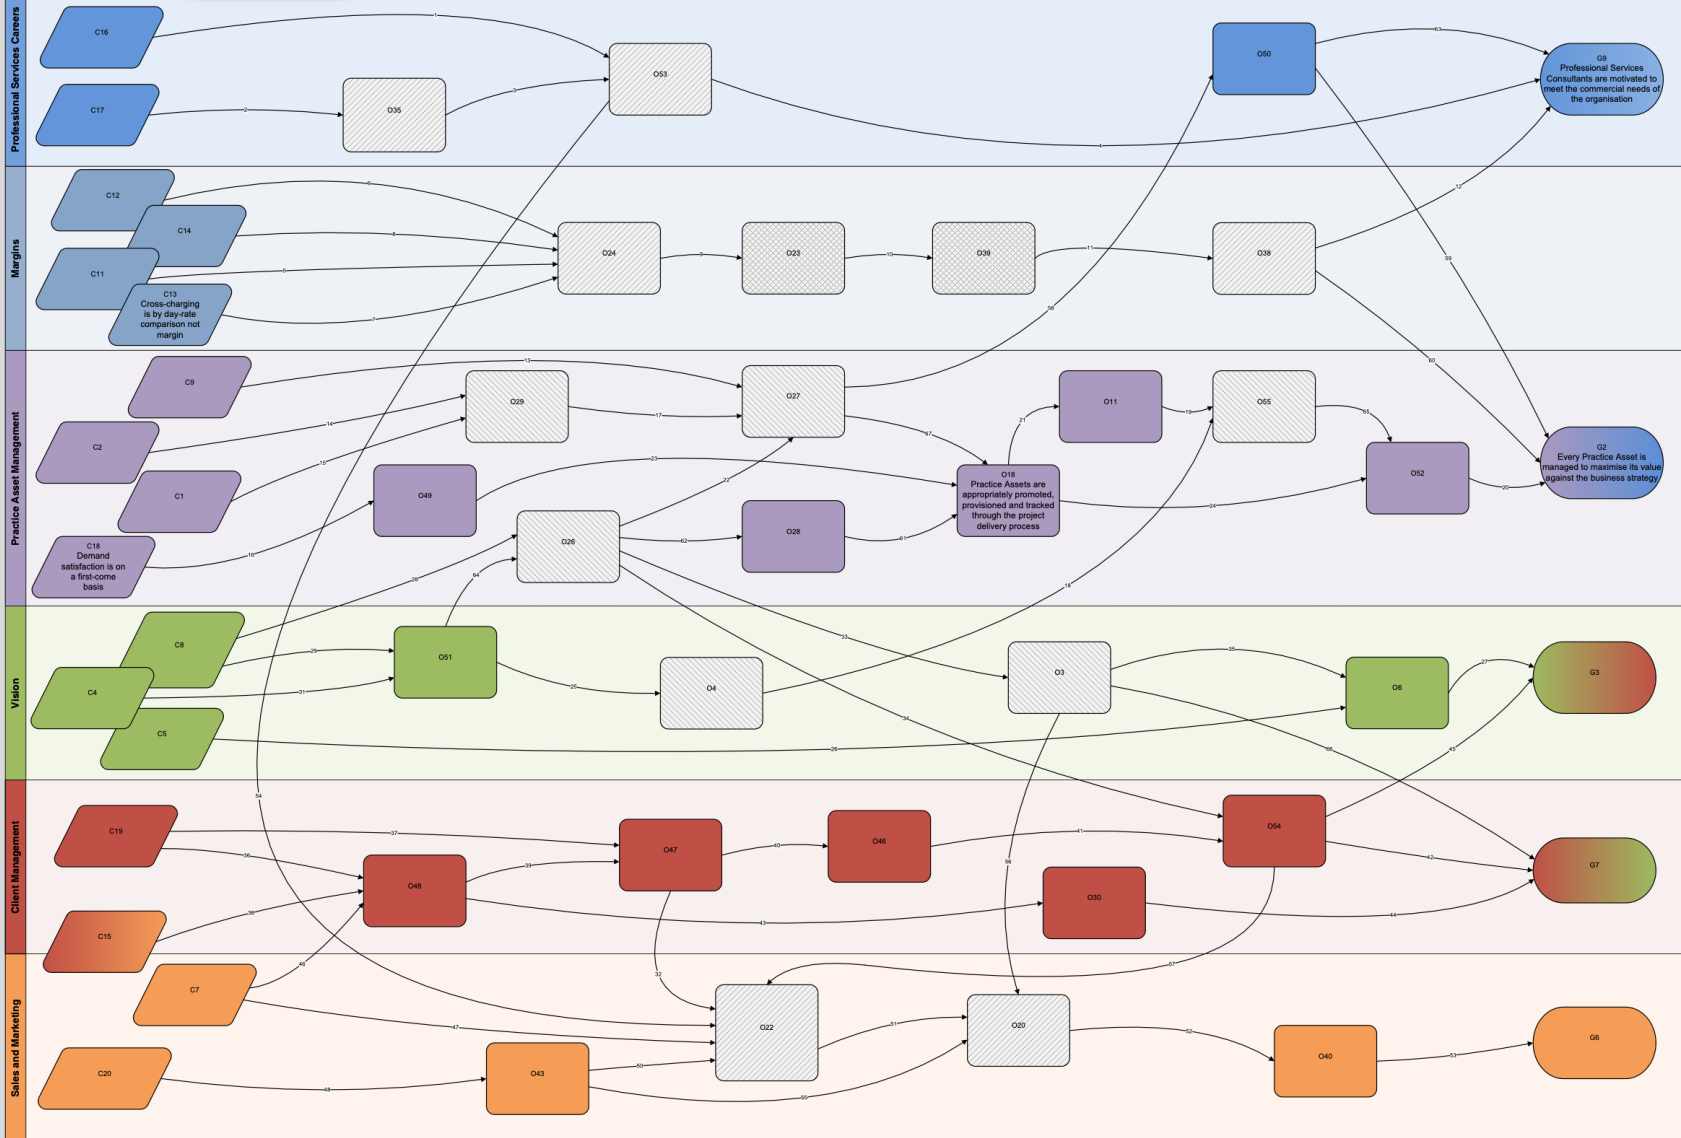

# 4 'STATES' - IN REVERSE

# Language

- Start with the end in mind (Seven Habits - Covey)
- Present tense (NLP)
- The Strategic Intent is a statement of achievement (over competition), in an area, because of something (unique)
- Outcomes are benefit statements, not milestones or mechanisms
- Current positions are things that are wrong and we want to change

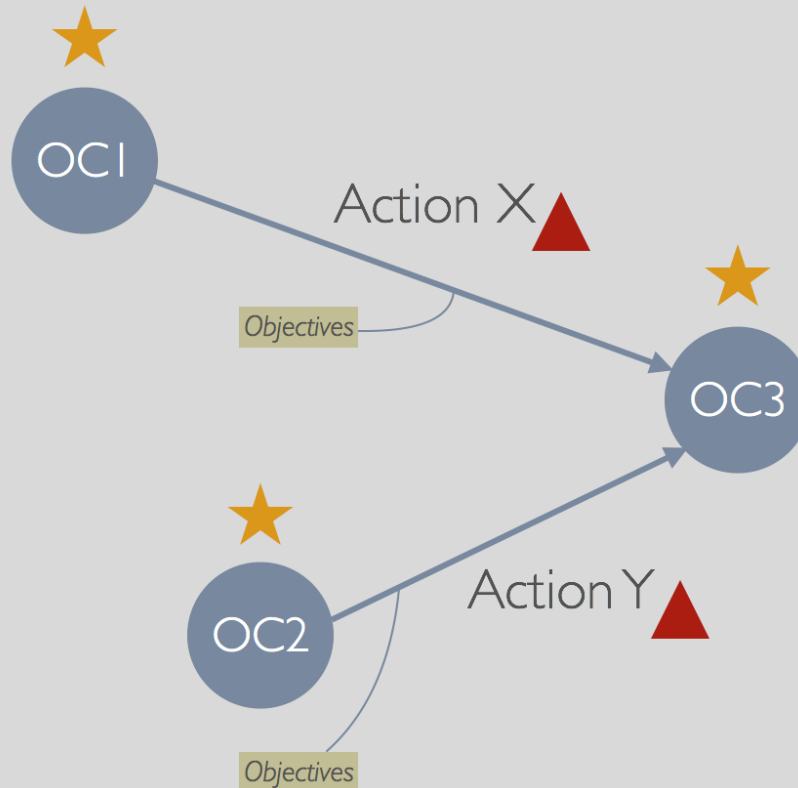

# Professional Services

# Benefits & Risks

# Developing A Strategy Map

- ★ Benefit
- ▲ Risk (new)

We then document the actions between outcomes.

Each action has risk.

Each action belongs to employees - who can see where they align.

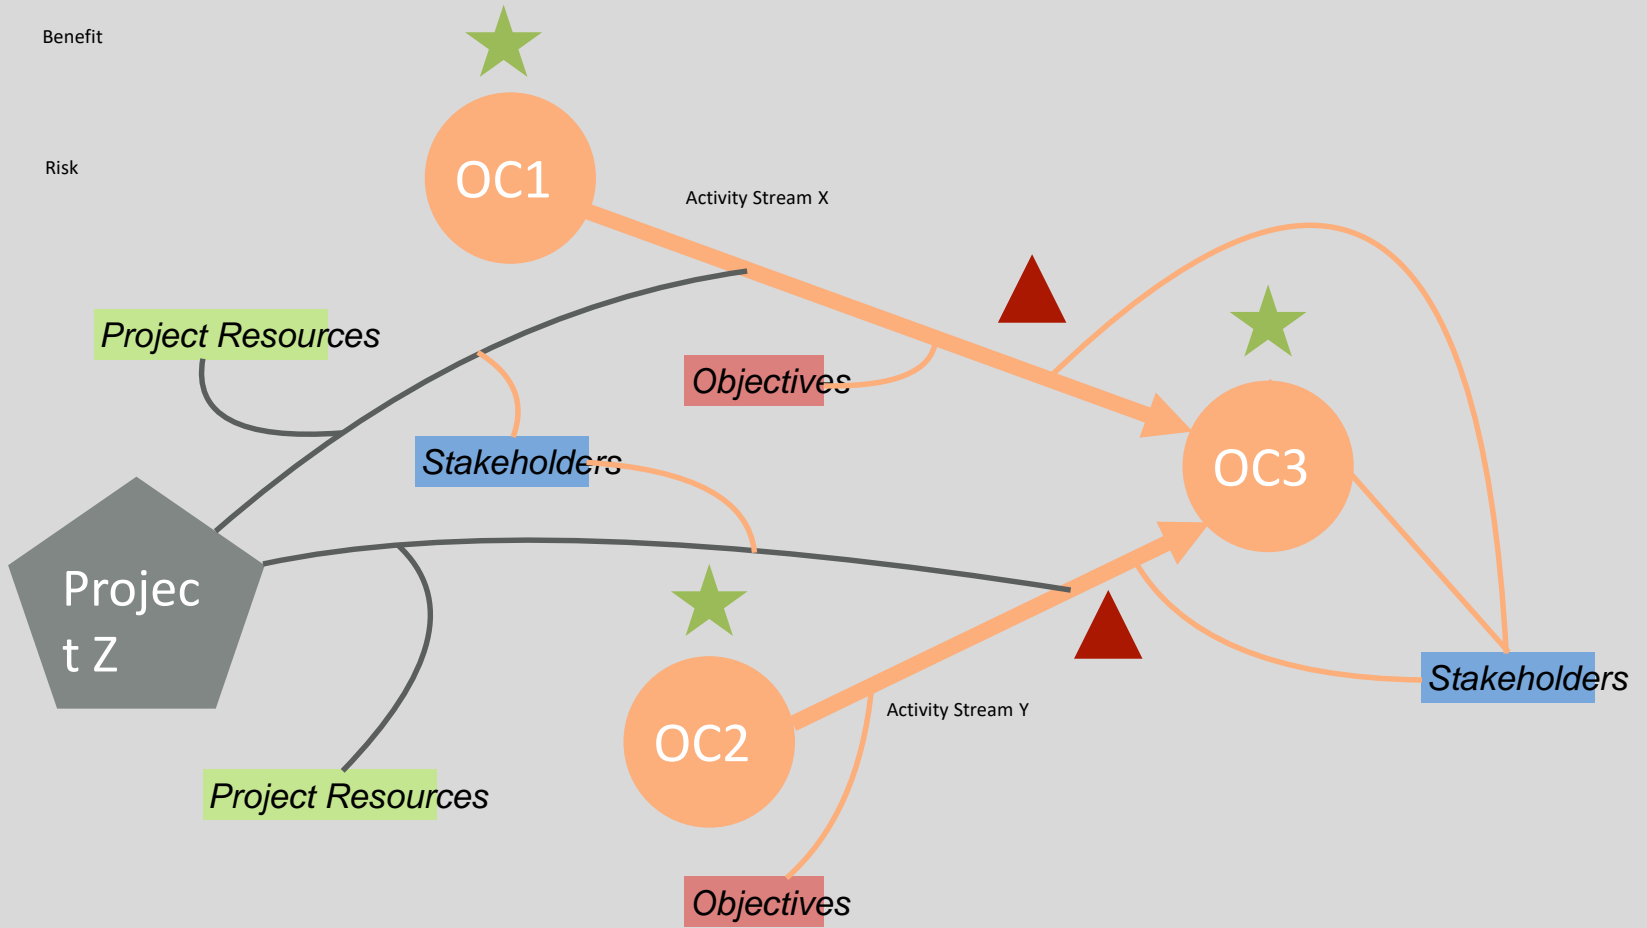

# Design the Programme

Benefit

Risk

# Developing a Strategic Intent

## The Strategic Intent Statement

Imagine a date 3-5  
years from now

This statement will  
be true, and  
everyone in the  
firm will know it

We are <in a position> as  
<measured by> in a  
<context>  
due to the <changes we have  
made>

Present Tense

## The Strategic Intent Statement

<in a position>

Describe the key position for your organisation that you would like to be able to say is true in the future.

- We are..... most significant part of the organisation.
- We have..... attained XYZ accreditation
- We are ..... operating in all jurisdictions where Russian is the official language

<as measured by>

Now expand these to explain how this position will be evidenced

- By..... transaction value
- By ..... revenue share
- Through.....satisfied clients
- By..... shareholder perspective

<in context>

Put a scope statement around this to limit it to reality

- in ..... the UK
- within ..... the global consumer electronics market

<changes we have made>

Finally, add a high-level change description

- We have ..... developed/rationalised new products
- We achieve this through ..... the intellectual property we own
- This is due to ..... the innovative way we engage our supply chain
- We have..... opened a new market / redefined a saturated market

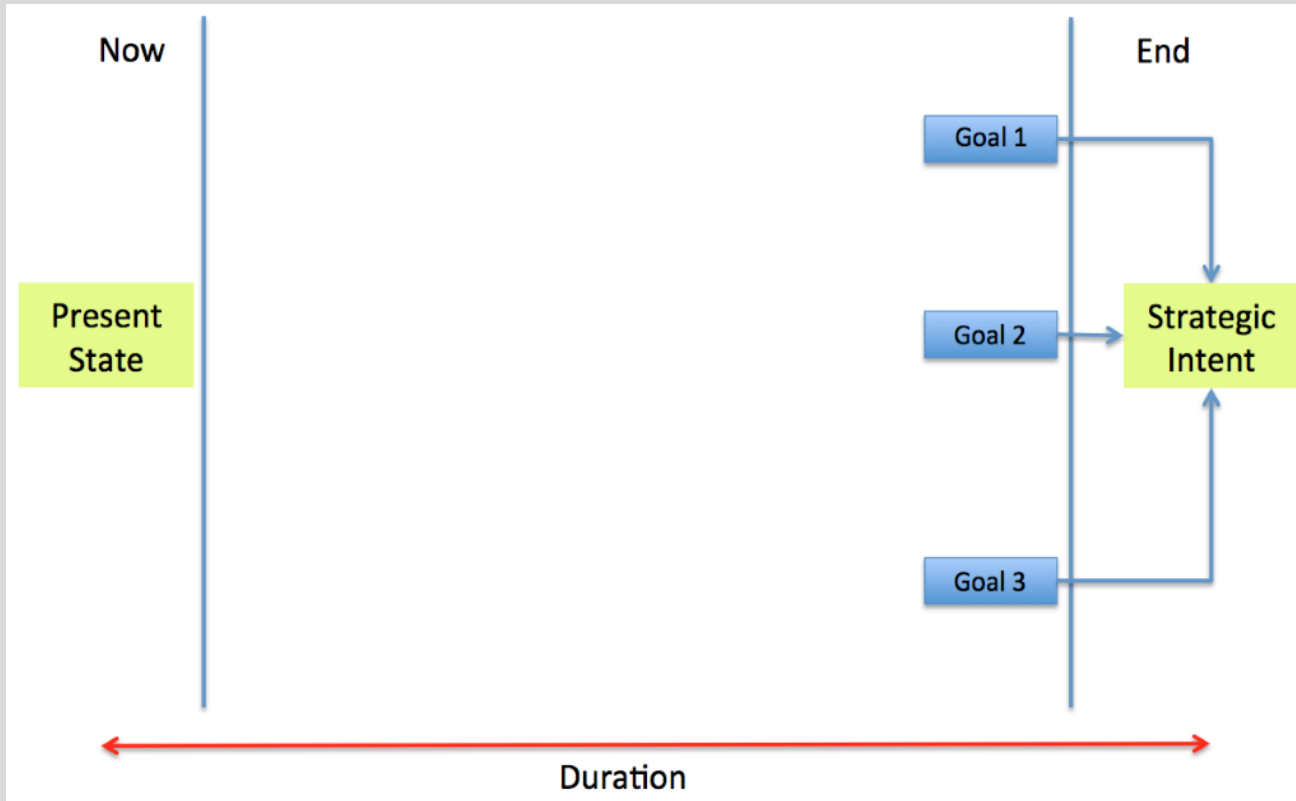

# Goals & Outcomes

# Developing A Strategy Map

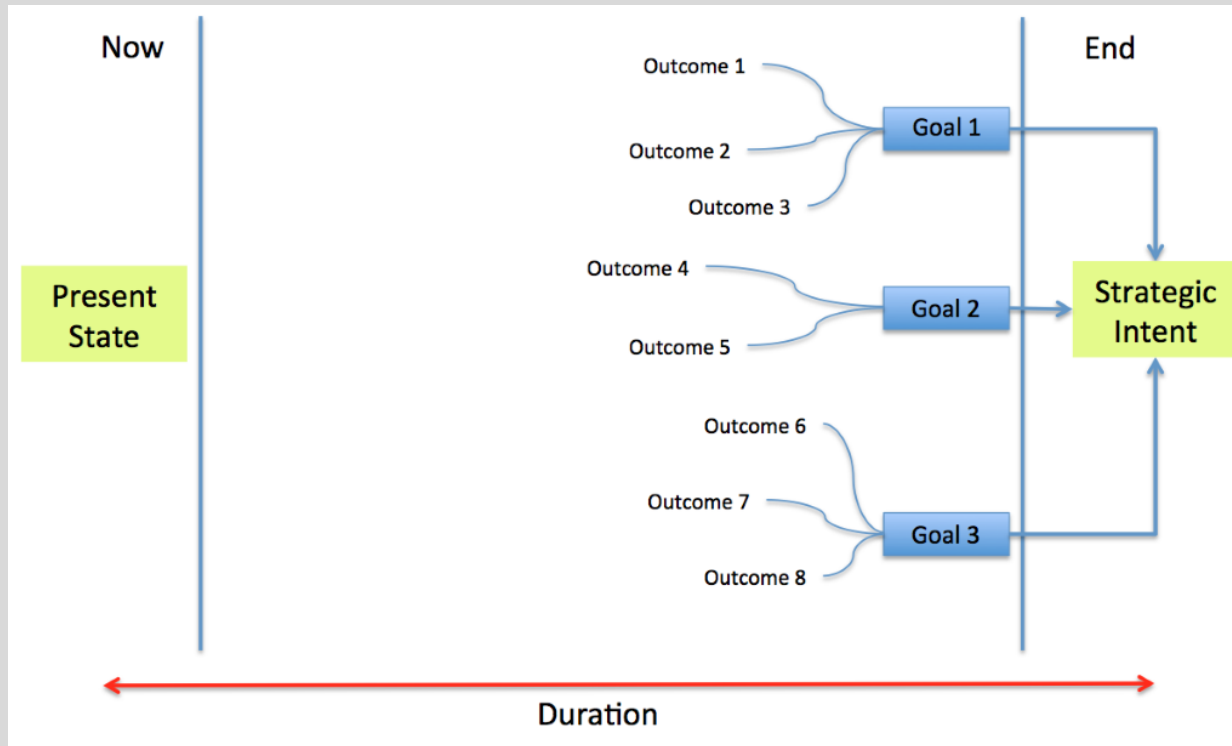

# Developing A Strategy Map

We establish Key Objectives (Goals) that when met, means the Strategic Intent has been achieved

Employees know what needs to be done to get there

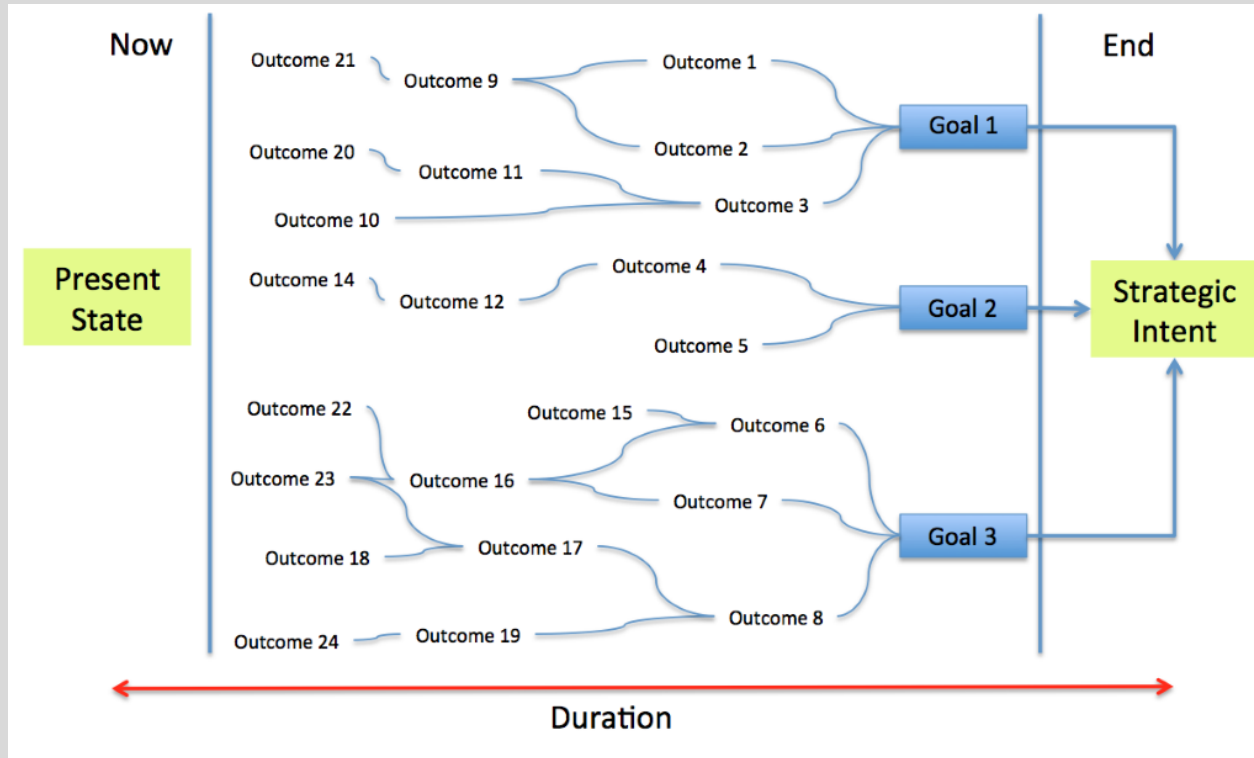

# Developing A Strategy Map

We establish “outcomes” that need to be achieved on the way to our key outcomes/goals.

Employees have a roadmap of achievements

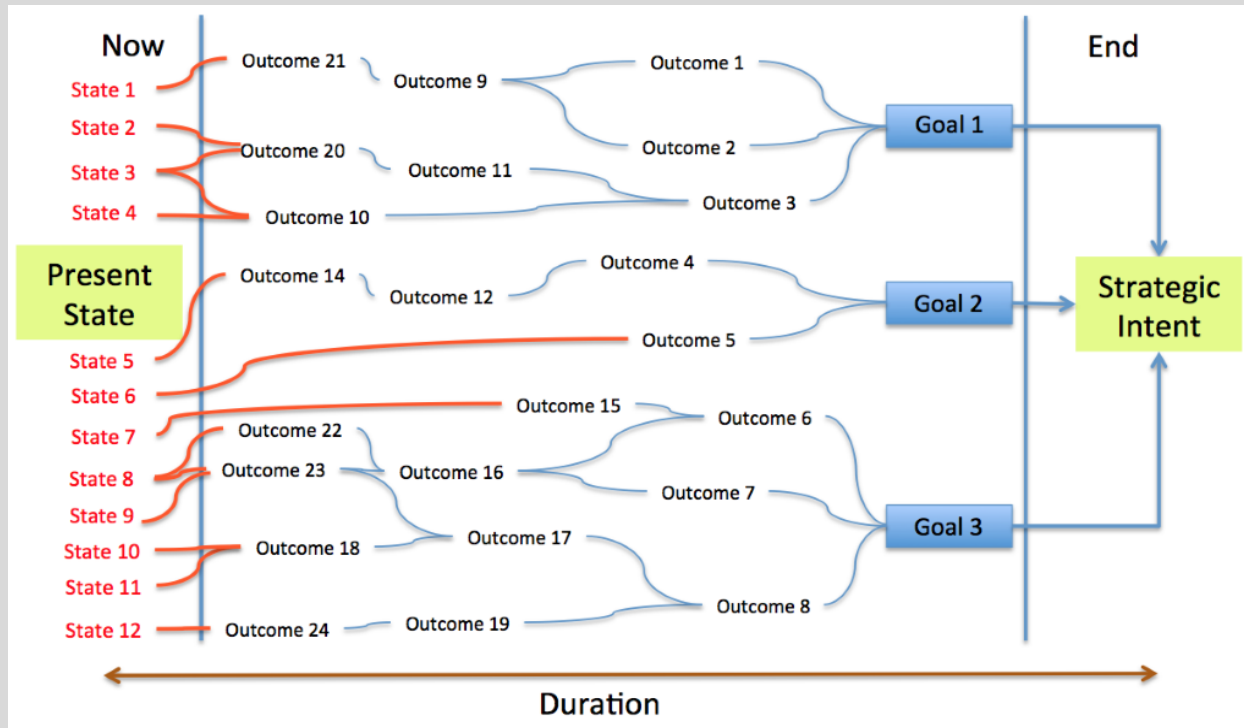

# Developing A Strategy Map

To get to each outcome may require one or more achievements before it can be realised.

The map of achievements works backwards

# Developing A Strategy Map

Until we get to where we are now – the present state

Employees have a full plan of what needs to be achieved

# Activity Streams & Projects

Now

End

Present  
State

Strategic  
Intent

Duration
